

Evacusafe EvacMAT

Every minute matters when it comes to saving lives.

That's why companies are turning to quick-to-deploy, life-saving equipment like the EvacMAT.

EvacMat is a compact, lightweight, and flexible sliding stretcher with an integrated foot pocket and an adjustable cross strap to hold the patient securely in place. It also comes with 3 color-coded securing straps to keep the person safely on-board and high-visibility, ergonomic pulling straps to help you move them across the floor quickly and efficiently.

Able to carry the weight of most people and made with flame-retardant, wipe-clean material, it is durable and easy to maintain. When not in use, the EvacMat rolls up into its own foot pocket for compact storage in a convenient location.
